Where to turn with the retirement of Ericsson Network Engineer

Why Nuiva is the right choice for Inventory Management

A seamless transition from legacy systems on your OSS Transformation Journey

As the telecommunications industry stands on the cusp of significant change, companies worldwide are grappling with the retirement of Ericsson's Network Engineer solution. This development poses both challenges and opportunities for network operators seeking reliable and innovative inventory management systems. In this critical juncture, Nuiva emerges as the trusted partner that telecommunications companies can rely on to navigate the future confidently.

A Legacy of Excellence Spanning Over Two Decades

For more than 20 years, Nuiva has been at the forefront of helping telecommunications companies around the globe optimize their operations. Our expertise in Next Generation Operations Support Systems (NGOSS) innovation has empowered some of the world's leading network operators to maintain seamless day-to-day functionality. We've built a reputation not just on longevity but on the consistent delivery of cutting-edge solutions that meet the evolving demands of the industry.

Mission-Critical, Modular Software Solutions

Nuiva's mission-critical, modular software solutions are designed to streamline the management of complex network deployments. In an era where

agility and scalability are paramount, our modular approach allows telecommunications companies to tailor solutions to their specific needs without overhauling their entire infrastructure. This flexibility ensures that operators can adapt swiftly to market changes and technological advancements.

Our solutions are central to customers' OSS transformation journeys, providing unrivaled network inventory and asset visibility. By offering a comprehensive view of network assets, we enable operators to make informed decisions, optimize resource allocation, and reduce operational costs. Our software doesn't just manage assets - it transforms them into strategic tools for growth and efficiency.

Unparalleled Network Inventory and Asset Visibility

In the fast-paced world of telecommunications, having real-time, accurate insights into your network inventory is non-negotiable. Nuiva's solutions offer unparalleled visibility, ensuring that every component of your network is accounted for and optimized. This level of transparency reduces the risk of downtime, enhances customer satisfaction, and positions your company as a leader in service reliability.

Financial Lifecycle Management

Effective financial lifecycle management is critical for maximizing return on investment and ensuring sustainable growth. Nuiva's software provides robust tools for tracking the financial performance of network assets throughout their lifecycle. From initial deployment to eventual decommissioning, our solutions help you manage costs, forecast expenditures, and make data-driven financial decisions.

Advanced Network Configuration Capabilities

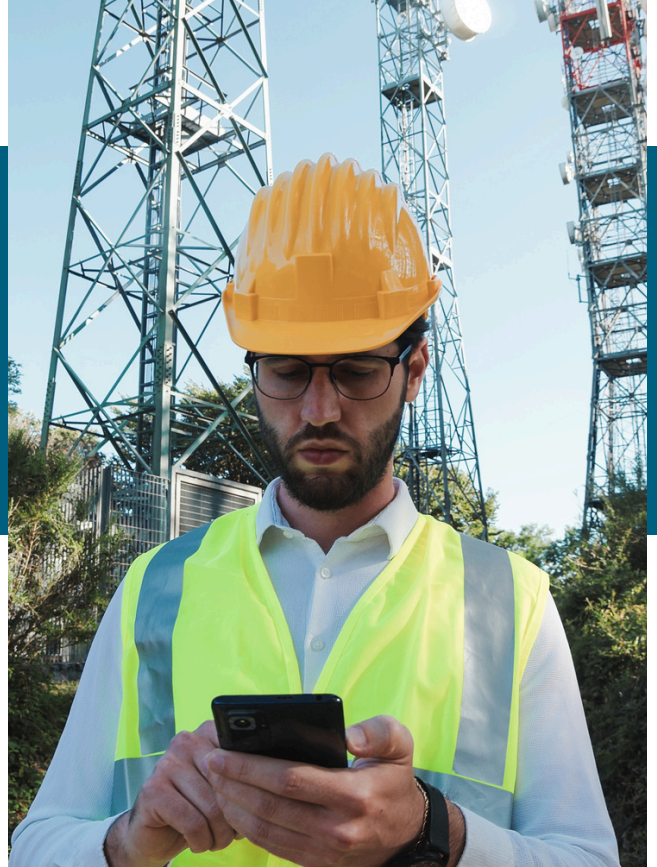

Nuiva understands that network configuration is a dynamic and complex task. Our advanced configuration capabilities allow operators to implement changes rapidly and accurately, minimizing disruptions and maintaining service quality. Whether expanding network capacity or integrating new technologies, our solutions provide the agility needed to stay ahead in a competitive market.

Why Telecommunications Companies Trust Nuiva

In times of significant change, trust becomes the cornerstone of successful partnerships.

Here's why Nuiva stands out as the trusted choice for telecommunications companies worldwide:

- **Proven Expertise in NGOSS Innovation:** With over two decades of specialized experience, Nuiva has a deep understanding of the telecommunications landscape. Our expertise in NGOSS ensures that our solutions are not only current but also forward-thinking.
- **A Track Record of Success with Leading Operators:** We've collaborated with some of the world's most prominent network operators, helping them achieve operational excellence. Our long-term relationships with these clients attest to our reliability and effectiveness.
- **Commitment to Excellence and Customer Success:** At Nuiva, customer success isn't just a goal—it's our mission. We are dedicated to providing solutions that not only meet but exceed our clients' expectations, fostering growth and innovation.

- **Flexible and Scalable Solutions:** Our modular software is designed to grow with you. As your company expands and the industry evolves, our solutions adapt to meet new challenges without unnecessary complexity or cost.

Seamless Transition from Legacy Systems

Transitioning from Ericsson's Network Engineer solution doesn't have to be a daunting task. Nuiva specializes in ensuring seamless integration with your existing systems, protecting your legacy investments while enhancing your operational capabilities. Our team works closely with your organization to develop a transition plan that minimizes downtime and disruption, so you can continue to deliver exceptional service to your customers.

Empowering Your OSS Transformation Journey

Operational Support Systems are the backbone of any telecommunications company. Nuiva's solutions are designed to be at the core of your OSS transformation journey, enabling you to:

- **Optimize Operations:** Streamline processes and reduce inefficiencies with tools that automate routine tasks and provide actionable insights.
- **Enhance Customer Experience:** Improve service reliability and responsiveness, leading to higher customer satisfaction and loyalty.
- **Drive Innovation:** Stay ahead of industry trends by leveraging the latest technologies and best practices embedded in our solutions.

Nuiva Won't Let You Down

In an industry where the stakes are high, and the margin for error is slim, having a partner you can rely on is invaluable. Nuiva's unwavering commitment to excellence means that you can trust us to deliver solutions that work - every time. We pride ourselves on our responsiveness, expertise, and the tangible value we bring to our clients.

Future-Proofing Your Network Operations

The telecommunications landscape is ever-changing, with new technologies and consumer demands constantly reshaping the industry. Nuiva's solutions are designed with the future in mind, ensuring that your network operations are not just ready for today but are

positioned to adapt to tomorrow's challenges. By choosing Nuiva, you're investing in a partnership that prioritizes long-term success and sustainability.

Choose Nuiva for Confidence in Change

The retirement of Ericsson's Network Engineer solution marks a pivotal moment for telecommunications companies. It's an opportunity to reassess, innovate, and position your organization for future success. Nuiva offers the expertise, solutions, and trustworthiness that make us the ideal partner in this journey.

Don't let uncertainty hinder your progress. With Nuiva, you have a partner committed to helping you navigate change confidently and effectively. Our mission-critical, modular software solutions provide the tools you need to enhance visibility, manage finances, and configure your network with unparalleled precision.

Take the Next Step with Nuiva

Now is the time to make a strategic decision that will impact your company's future. Trust in a partner with a proven legacy of excellence and a vision aligned with your success. Nuiva won't let you down.

Contact us today to learn more about how Nuiva can support your OSS transformation journey and elevate your network operations to new heights. Together, we can build a resilient, efficient, and innovative future for your telecommunications business.

About the Author

As Nuiva's Chief Commercial Officer, Chris Pupia is responsible for all worldwide sales, business development, and marketing activities for the organization. A proven commercial and sales leader with over 25 years' of experience, Chris is laser-focused on developing deep relationships with our customers and partners, positioning the long-term benefits of our differentiated NGOSS and advanced cloud and security innovations, and helping them succeed by reaching the maximum value from their Nuiva solutions. Chris has held senior sales and leadership roles at Kurmi Software, Ericsson, Metaswitch Networks (now Microsoft), Genband (now Ribbon) and Nokia. Most recently he held the post of Senior Vice President of Global Sales at Skyvera where he developed and led their multi-level go-to-market plans.

About Nuiva

Nuiva helps network operators make rapid, intelligent decisions based on relevant and real-time data. Our modular network inventory and asset visibility, financial lifecycle management, and network configuration solutions simplify and streamline the management of complex networks while complementing and protecting legacy investments by interacting seamlessly with existing installed products. We maximize ROI through our unique and unmatched speed of deployment and time to value. Visit us at nuiva.com.
